Release of the short story "The Maelzel Chess Player" by Edgar Allan Poe

The short story is currently available at "Folio classique" editions (translation by Charles Baudelaire). It is inserted between articles on automata and androids and an article on Intelligence published in 1917. It is a demonstration by E. A. POE establishing a human intervention in the chess player's automaton. The author relies on flawless reasoning to reveal the deception. The "black box" of this automaton will have no more secret for you after reading!
